

# SafeTrack

## Grain Temperature Monitoring System

**Monitor Your Grain, Anytime, Anywhere.**

SafeTrack is a complete solution for monitoring commodity temperatures. The SafeTrack system provides simple, accurate and fast grain monitoring. Data analyzing, reporting and archiving is quick and easy.

### SafeTrack in action

Easy to use scanning and reporting for at-a-glance analysis.

Wireless radio options minimize conduit and installation costs.

Expandable to any size system. Modular components make servicing and future expansion a snap.

SafeTrack systems are installed worldwide.

- Commodity temperatures
- Ohms testing for cable integrity check
- Product rate-of-rise
- Detailed audit trail

- Historical graphing to plot trends
- Flexible reporting options
- Remote scanning over the Internet
- Manual and scheduled scanning and reporting
