## Grain Temperature Monitoring System

**Call for a free Quote**

### SafeTrack Software

A clean and simple interface makes scanning your bins effortless. Easy to read graphics show status and problems at-a-glance. Run SafeTrack manually or automatic, locally or over the network/Internet for anytime-anywhere monitoring.

### SafeLink Radios

Significantly reduce installation costs by using radios to link Remote Scanners to your PC. Radios are available in 900 MHz, 2.4 GHz and 868 MHz models for use worldwide.

### SafeTrack Remote Scanners

Connect temperature cables to a Remote Scanner and begin monitoring right away. SafeTrack Remote Scanners easily adapt to most existing temperature cable systems.

### SafeGrain Temperature Cables

Rugged and reliable thermocouple cables provide the core of the SafeTrack system.
